Subject:Uploading revised files to the MEGA cloud server

Date:Sun, 13 Feb 2022 08:06:59 -0500

From:Dan White <danwhite@mac.com>

All:

I have been having a number of Scouts recently that have had trouble uploading their updated/revised project files to the MEGA cloud server. What appears to be happening is that they are uploading to their personal account folders, not the shared folder for all Iron Hill Eagle projects that has their name on it.

Please make sure to let all your Eagle candidates know they must upload to **the shared folder**. If they do not I cannot see their updated submission as I do not have access to personal account folders, only the shared ones I set up for them.

YIS

Dan White
